29 JUL 1952

SPOT INTELLIGENCE REPORT

SUBJECT: (Unclassified) UNKNOWN SUBJECT(S):
Sighting of Unconventional Aircraft,
Nahant, Mass., 0215-0218 hours, 23 Jul 52

TO: Director of Special Investigations
Headquarters USAF
Washington 25, D. C.

SYNOPSIS:

On 24 July 1952 a report was received at Detachment "B", 1st District OSI (IG) USAF, Boston, Mass., relative to a sighting of two (2) unidentified objects by a Seaman on watch at Nahant Coast Guard Station, Nahant, Mass. Details of interview with observer set forth. No activity or condition developed that accounts for sighting.

DETAILS:

On 24 July 1952 a report was received at Detachment "B", 1st District OSI (IG) USAF, Boston, Mass., to the effect that two (2) unidentified objects had appeared over the Nahant Coast Guard Station at approximately 0215 hours, EDT, on 23 July 1952. On 25 July 1952, Seaman HENRY ARNPRIESTER, Coast Guard Station, was interviewed by Special Agent JULIUS B. POPPINGA and offered the following information:

a. Description: Two (2) bluish lights approximately 5 feet in diameter, appearing as flat, disc-shaped objects having no aerodynamic features and moving without sound or exhaust trail at a speed faster than a four-engine airliner at an altitude of 1,100 to 2,000 feet.

CLASSIFICATION CANCELLED ... BY AUTHORITY OF THE DIRECTOR ...

b. Formation: Objects appeared to be side-by-side. Observer could not estimate the actual distance between the lights but advised that from the ground they appeared to be about 5 yards apart. This formation did not change during the maneuvers described below.

c. Maneuvers: [redacted]first sighted the lights in the Southeast sky at an angle of approximately 45 degrees above the horizon. Objects were descending gradually toward the point of observation in a northwesterly direction. When they were at a distance of approximately 1 1/2 miles from the point of observation, they executed an extremely sharp turn, described by observer to be similar to the path of a ball bouncing off a wall. Objects returned in the exact direction from which they had come and were gradually gaining altitude until they disappeared. Observer noticed no change in the speed of the objects during the entire period of observation.

d. Manner of Disappearance: Disappearance was gradual as distance increased. Observer stated that both objects went out of sight at the same time.

e. Time sighted: [redacted]first sighted the objects at 0215 hours, and they remained in view until 0218 hours, or a total of 3 minutes.

f. Manner and Location of Observation: No optical or mechanical aids were employed. [redacted] on watch duty and at time of sighting was standing just east of the Coast Guard Station on Nahant Island.

g. Identifying Information on Observer [redacted] is 22 years of age and has served in the Coast Guard for 21 months. He advised that the sight of falling stars, searchlight beacons, and navigational lights on conventional aircraft is distinctly different from the objects described. He stated that the objects were close enough so that if they had been conventional aircraft, he would have been able to see wings and tail surfaces and would definitely have heard engine noise. He also believed that the maneuvers executed by the objects could not be duplicated by conventional aircraft. [redacted]her stated that he was "mystified" by the sighting and was in doubt as to whether he should report them at all. He did so, however, in accordance with the established procedure. [redacted]added that, when he first saw the lights, he called to Seaman [redacted]who had just gone off watch. [redacted]returned and, according to [redacted]ghted the same objects. [redacted]is presently on leave and could not be interviewed.

h. Weather Conditions: [redacted]described the sky as clear with a few scattered clouds and excellent visibility. Weather conditions at 0200 hours, EDT, 23 July 1952, were reported by the U.S. Weather Bureau, Logan International Airport, East Boston, Mass., as follows: "Clear, northwest wind, 10 miles per hour, visibility 12 miles, temperature 77 degrees".

1D-OSI 24-150

i. Existing Conditions that might Account for Sighting: None. No physical evidence exists, and no interception action was taken at the Coast Guard Station. However, the incident was reported b[redacted] to the 654 AC&W Radar Station, Brunswick, Maine on 23 July 1952.

ACTION:

Two (2) copies of this report have been forwarded to the Commanding General, Air Materiel Command, Wright-Patterson Air Force Base, Dayton, Ohio, Attention: MCIS. No further action is contemplated by this District Office.

ROBERT S. JONES
